NORTHMAN Company

We are the only manufacturer of **maxus sailing yachts** as well as **courier 970** and **nexus 850** motor boats.

Our mission is to meet sailors dreams - the dreams of the best, the safest, very comfortable and precisely made yacht. We proceed with passion, relying on the modern technology and experienced team. We design, introduce and accomplish unique solutions. We break standards and keep ahead of expectations creating exceptional projects.

The highest quality Northman yachts have met a positive reception all over the world. They are identified with the highest level of nautical effectiveness, which has been not only verified by Polish and foreign sailors but also in dozens of prizes, both from national and international experts. We create units for inland shore as well as open sea sailing, for racing and even for a round the world trip (Maxus Solo Around). Both charter models and custom made. We offer only the best quality, we do not sell semi-finished items so we do not have unauthorized, low-quality copies. We work with the top brand equipment and don't make savings from bad solutions.

Safety Our boats are not only certified by the Polish Register of Shipping but also prepared according to the requirements of other countries, registers and organizations (like ISAF Offshore Special Regulations, CE).

Awards
